RON ACETO TEACHING PORTFOLIO RESOURCE

Teacher Implementation Guide: AI Literacy

Responsible classroom routines for AI use, learning support, and student ownership.

Designed for practical classroom use with student-safe language, clear routines, and standards-aware planning notes.

AI Literacy Starter Kit | Updated June 2026

Teacher Implementation Guide: AI Literacy

Standards review note (June 2026): Tennessee Computer Science Foundations course standards (C10H11) remain published by the Tennessee Department of Education as May 2023 standards. Standards references in this resource are intended as cautious instructional alignment notes; final alignment should be confirmed against local district pacing, course placement, and current district guidance.

Teacher Implementation Guide AI Literacy

Teacher Implementation Guide

AI Literacy Starter Kit | Implementation Guide | Teachers / Administrators

Purpose: This guide helps teachers introduce AI literacy in a practical, student-safe, and

classroom-ready way. It can be used as a stand-alone mini-unit or as a starting point for schoolwide AI expectations.

This guide helps teachers introduce AI literacy in a practical, student-safe, and classroom-ready way. It can be used as a stand-alone mini-unit or as a starting point for schoolwide AI expectations.

Implementation Goals

Introduce AI as a learning support tool, not a replacement for thinking.

Help students understand acceptable and unacceptable AI use.

Teach students to verify important information.

- Protect student privacy and classroom trust.

Provide common language for students, teachers, and families.

Recommended Sequence

When

Activity

Teacher Focus

Day 1

Student AI Agreement and

Ron Aceto | Page 3

discussion of school

expectations

Keep student thinking, verification, honesty, and privacy at the center.

Day 2

Lesson: AI as a Learning

Partner

Keep student thinking, verification, honesty, and privacy at the center.

Day 3

Better Prompts vs. Shortcut

Prompts activity

Keep student thinking, verification, honesty, and privacy at the center.

Day 4

Responsible AI Use Checklist

applied to a current

assignment

Keep student thinking, verification, honesty, and privacy at the center.

Ongoing

Use student-safe AI examples

when introducing research,

writing, studying, coding, and

project work

Ron Aceto | Page 4

Keep student thinking, verification, honesty, and privacy at the

center.

Classroom Norms to Establish

- AI use must follow teacher directions for each assignment.
- Students should be able to explain any work they submit.

A

AI should help students think better, not think less

1

AI-generated information should be checked before being trusted.

- Students should not enter personal, private, or sensitive information into AI tools.
- The final product should reflect the student's own understanding and voice.

Suggested Teacher Language

"In this class, AI can be used as a learning partner when I allow it. That means it can help you understand, practice, brainstorm, revise, or organize. It cannot replace your thinking, your

voice, or your responsibility for the work."

Administrator-Facing Value

- Creates a consistent responsible-use framework.
- Supports academic integrity without ignoring AI reality.

Helps teachers move from fear or confusion toward practical classroom routines.

- Connects AI literacy to career readiness, computer science, digital citizenship, and cybersecurity.

Family Communication Option

Families can be told that students are learning how to use AI safely, honestly, and productively. The goal is not to help students avoid learning. The goal is to help them ask better questions, verify information, protect privacy, and become more thoughtful users of technology.

A

AI should help students think better, not think less

Detailed Tennessee Standards Connection

Ron Aceto | Page 5

This implementation guide helps teachers connect the starter kit to responsible AI, digital ethics, verification, privacy, and structured technology-use routines.

Standards source: Tennessee Department of Education, Computer Science Foundations (C10H11), May 2023. Confirm final alignment against local district pacing, approved course placement, and teacher directions.

This resource may support the following Tennessee standards when used as part of AI literacy,

digital ethics, computer science, or cybersecurity instruction

- CSF 13.1 - Social, Legal, and Ethical Issues: Students identify responsibilities related to ethical technology use, academic integrity, copyright, privacy, and appropriate AI use.
- CSF 8.1 - Emerging Technologies: Students examine how emerging technologies influence society, school, work, and future readiness, using evidence and reflection.
- CSF 9.2 - Troubleshooting Process: Students use a structured process to identify a need, test or improve a response, verify the result, and document what they learned.

Ron Aceto | Teaching Portfolio Resource

- CSF 14.1 - Data Security: Students explain why protecting data and personal information matters and connect privacy decisions to responsible technology use.

Cautious guidance: Alignment depends on local district pacing, approved course placement, teacher directions, and how the resource is used as part of instruction.
