RON ACETO TEACHING PORTFOLIO RESOURCE

Cybersecurity Careers One-Pager

Defensive, ethical, career-connected cybersecurity habits for high school learners.

Designed for practical classroom use with student-safe language, clear routines, and standards-aware planning notes.

Cybersecurity & Digital Ethics Starter Kit | Updated June 2026

Cybersecurity Careers One-Pager

Standards review note (June 2026): Tennessee Computer Science Foundations course standards (C10H11) remain published by the Tennessee Department of Education as May 2023 standards. Standards references in this resource are intended as cautious instructional alignment notes; final alignment should be confirmed against local district pacing, course placement, and current district guidance.

Security skills should help students protect people, systems, and information.

[Cybersecurity Careers One-Pager](#)

[Student Tool](#)

Audience: Students | Grades 8-12

Purpose

- Cybersecurity professionals help protect people, organizations, systems, and data. Their work supports confidentiality, availability, and integrity. Students do not need to be expert hackers to begin exploring cybersecurity. They need curiosity, problem-solving habits, ethics, and a willingness to keep learning.

Student-safe note

- Use fictional examples. Do not use real passwords, real accounts, live suspicious links, or private information.

Standards summary

- This resource may support CSF 3.1, CSF 14.1, CSF 14.2, CSF 14.3.
- Detailed alignment depends on local district pacing, approved course placement, and teacher

directions.

Why Cybersecurity Careers Matter

Cybersecurity professionals help protect people, organizations, systems, and data. Their work supports confidentiality, availability, and integrity. Students do not need to be expert hackers to

Ron Aceto | Page 3

begin exploring cybersecurity. They need curiosity, problem-solving habits, ethics, and a willingness to keep learning.

Sample Cybersecurity Roles

Role

What They Do

Helpful Skills

SOC Analyst

Monitors alerts and investigates

suspicious activity

Pattern recognition, documentation,

communication

Information Security

Analyst

Helps protect systems and data

Risk thinking, technical awareness, policy

understanding

Incident Responder

Helps contain and recover from

security events

Calm problem solving, troubleshooting,

teamwork

Cloud Security

Specialist

Protects cloud accounts, apps, and

Ron Aceto | Teaching Portfolio Resource

data

Ron Aceto | Page 4

Cloud concepts, access control,

configuration

Security Awareness

Trainer

Teaches people how to avoid security

mistakes

Teaching, writing, communication,

empathy

Digital Forensics

Analyst

Investigates what happened after an

incident

Evidence handling, attention to detail,

reporting

Cybersecurity Careers One-Pager

Security skills should help students protect people, systems, and information.

Career-Ready Habits

- Document what you observe and what you tried.
- Verify before acting.
- Protect private information.
- Ask ethical questions before using powerful tools.

- Learn the basics of networking, operating systems, coding, and cloud technology.
- Communicate clearly with technical and non-technical people.

Student Reflection

One cybersecurity role that interests me

One skill I already have that could help

Ron Aceto | Page 5

One skill I would need to build

One ethical responsibility cybersecurity workers have

Cybersecurity Careers One-Pager

Security skills should help students protect people, systems, and information.

Detailed Tennessee Standards Connection

Tennessee Standards Connection

This one-pager supports standards when students explore cybersecurity occupations, work activities, tools, skills, and career-connected habits.

Standards source: Tennessee Department of Education, Computer Science Foundations (C10H11), May 2023. Confirm final alignment against local district pacing, approved course placement, and teacher directions.

This resource may support the following Tennessee standards when used as part of

Ron Aceto | Teaching Portfolio Resource

cybersecurity, digital ethics, computer science, AI literacy, or career-connected technology

instruction

- CSF 3.1 - Occupations: Students research information technology occupations, work activities, tools and technology used, work environments, and knowledge and skills needed for success.

- CSF 14.1 - Data Security: Students explain why data security is a priority and demonstrate understanding of confidentiality, availability, and integrity.
- CSF 14.2 - Security Breaches: Students demonstrate understanding of security breaches, enterprise-level security, encryption, protocols used to secure websites, and privacy considerations.
- CSF 14.3 - Security Practices: Students identify security practices for computer and network systems, including access control, encryption techniques, BIOS features, and malware response strategies.

Ron Aceto | Page 6

Use guidance

- Confirm final alignment against local district pacing, approved course placement, and teacher directions.
- Keep instruction defensive, ethical, age-appropriate, and classroom-safe.

Standards Review Standards review note (June 2026): Tennessee Computer Science Foundations course

standards

(C10H11) remain published by the Tennessee Department of Education as May 2023 standards. Standards

references in

this resource are intended as cautious instructional alignment notes; final alignment should be confirmed

against local

district pacing, course placement, and current district guidance.

Accessibility and Use

This PDF uses selectable text, a single-column reading order, high-contrast colors, consistent headings, and generous spacing to support desktop, tablet, and mobile viewing.
